Control Engineering INDEX

VOLUME 9 . . . JANUARY—DECEMBER 1962

(WN) What's New
(IP) Industry's Pulse Unless otherwise designated, items are feature articles or Ideas at Work.

A

Accelerometers

Measuring angular acceleration with linear accelerometers. V. B. Corey Mar. 79
Vibrating string measures acceleration (WN) . . . . . Apr. 24

Actuators

Attitude control of earth satellites. R. K. Whitford. I: Sources of torque Feb. 93
Calculating servomotor speed-torque curves. P. H. Trickey . . . . . Mar. 81
Electric valve actuators: slow today, digital tomorrow (IP) . . . . . Oct. 61
Electrohydraulic pulse motor. Kaiwa & Inaba . . . . . Jan. 73
Explosive actuation—fast, powerful, reliable. T. J. Throgmorton . . . . . Aug. 71
Friction buster puts limit cycle to use. C. W. Robinson . . . . . Nov. 127
Hydraulic digital actuator works on eight-bit input (WN) . . . . . Sept. 32
Impedance discs—more torque at low speeds. Y. M. Rozov . . . . . Dec. 81
Nuclear ship Savannah to get digital rod control system (WN) . . . . . Oct. 22
Slotless armature—key to motor's low inertia. Yaskawa & Fukuda . . . . Nov. 87

Adaptive control

Adaptive control flies the X-15. Lindahl & McGuire . . . . . Oct. 93
Autopilot for business aircraft is adaptive (WN) . . . . . Apr. 22
Dividing computer for automatic slope and gain control. Pawlik & Vasu Jan. 66

Air traffic control

New directions for air traffic control (WN) . . . . . Jan. 21

Aircraft

Adaptive control flies the X-15. Lindahl & McGuire . . . . . Oct. 93
Autopilot for business aircraft is adaptive (WN) . . . . . Apr. 22
The case for dead reckoning. E. M. Fischel . . . . . Oct. 71
DQC in a service industry. McGuire & Galbraith . . . . . Sept. 143
Programmed loading for spectrum fatigue tests. E. Schiff . . . . . Dec. 90
Schuler detuning cuts verticality errors. E. M. Fischel . . . . . July 95

Amplifiers

Electronic
Potentiometric amplifiers improve impedance buffering. James DiRocco . . . . . July 87
Pulse width modulation saves truck battery. Bruce Cross . . . . . Dec. 115
Magnetic
Fast response amplifier controls large ac motors. A. H. Myles . . . . Oct. 77

Analog-to-digital conversion

Encoder speed nomograph. M. C. Wilson . . . . . July 97
Improving reliability of shaft position encoders. M. C. Wilson . . . . . June 109

Analysis instruments

Automatic titrator tests oil samples continuously. D. A. Patient . . . . . Apr. 143
Computer-spectrometer reads out component percentages. W. Schulz . . June 147
Controlling composition of column product. Stanton & Bremer . . . July 104
Integrating chromatograph measures stream-component volumes. E. Lehrer May 95
Jumbled marketplace fails to slow stream analyzers (IP) . . . . . Dec. 65
X-rays gage ash content continuously. H. Buhrmann . . . . . July 121

Automatic warehousing

Changing market idles $300,000 warehousing system (WN) . . . . . Jan. 32

C

Character reading (see also information systems)

Circular scans read handwriting. Butterfield & Dowsing . . . . . Aug. 113
Frequency coding identifies 56 characters. J. C. Bliss . . . . . Aug. 115
When can you justify optical character readers? T. W. Helweg . . Feb. 119

Checkout, automatic

Computer-directed checkout for NASA's biggest booster. J. W. Dahnke . . . . . Aug. 84
Oscillator test set checks linearity and deviation. G. J. Himler & others Oct. 113

Circuits

Control applications for new dead-space limiter. G. A. Korn . . . . . Mar. 91
Controlled rectifier fires ignitron fast. D. C. Graham . . . . . Oct. 116
Dividing computer for automatic slope and gain control. Pawlik & Vasu . . . . . Jan. 66
Extruder cooling cycle sets heater power. F. Perrotta . . . . . Aug. 117
Fast response amplifier controls large ac motors. A. H. Myles . . . . . Oct. 77
Hybrid logic for special purpose computers. T. G. Hagan . . . . . Oct. 73
Pneumatic logic. E. L. Holbrook, IV: Safety and reliability . . . . . Feb. 89
Simulating true dry friction on the analog computer. Wang & Shen. Oct. 91
Single SCR controls dc shunt motor. Baruch Berman . . . . . Aug. 79
Telemetry transducers for electrical variables. Galman & Miller . . Aug. 89
A way to design low-loss nonlinear networks. T. R. Fredriksen . . . . June 117

Coding of data

Converting integers: mathematics points to the equipment. P. M. Kintner . . . . . Nov. 99
Frequency coding identifies 56 characters. J. C. Bliss . . . . . Aug. 115
In coding it's the structure that counts. W. J. Frink . . . . . Oct. 100
Keys identify tools in automatic changer. John Fulton . . . . . Aug. 118
Microwaves identify freight cars. Hamann & Boyd . . . . . Mar. 102
9 criteria for selecting a digital code. C. H. Wolff . . . . . Apr. 128

Color

In-plant colorant computer matches colors quickly. McMahon & Shevzov . . . . . Feb. 133
Spectrophotometer digital integrator prints out color values. T. Azuma & others . . . . . Feb. 131

Company profiles

Controls Co. wields washing machine talents for industry (WN) . . . . Sept. 38
Du Pont analyzers: out to earn a reputation (WN) . . . . . Oct. 38
Electronic Controls, Inc.—programmed growth pays off (WN) . . . . . June 35
Garrett's sharing policy aims at Canadian sales (WN) . . . . . Aug. 36
GPE takes first strong steps into industrial, commercial markets (WN) May 32
Geotech parlays oil field skills to tackle data handling (WN) . . . . . Apr. 34
Go-betweens handle sales of spare computer time (WN) . . . . . Nov. 38
ITT sets sights on communications control (WN) . . . . . Feb. 40

Components

Ball and disc read angular velocity directly. A. L. Fisher . . . . . Nov. 125
Continuous pot's got no deadspace. L. H. Rowley . . . . . Aug. 117
Electric valve actuators: slow today, digital tomorrow (IP) . . . . . Oct. 61
Electrohydraulic pulse motor. Kaiwa & Inaba . . . . . Jan. 73
Electromechanical generator-multiplier simplifies response tests. J. G. Balchen . . . . . June 151
Encoder speed nomograph. M. C. Wilson . . . . . July 97
Explosive actuation—fast, powerful, reliable. T. J. Throgmorton . . Aug. 71
Free rotor gyros. J. M. Slater . . . . Nov. 92
Hydraulic digital actuator works on eight-bit input (WN) . . . . . Sept. 32
Impedance discs—more torque at low speeds. Y. M. Rozov . . . . . Dec. 81
Improving reliability of shaft position encoders. M. C. Wilson . . . . . June 109

Measuring angular acceleration with linear accelerometers. V. B. Corey Mar. 79
Meter relays—choosing the right type. J. F. Schmidheini ..... Juiy 77
Miniature incremental rockets vie for spacecraft control (WN) ..... Nov. 26
Novel mass flowmeter. J. Haffner & others ..... Oct. 69
Pulse testing SCR's saves time and watts. D. H. Breslow ..... June 145
Slotless armature—key to motor's low inertia. Yaskawa & Fukuda ..... Nov. 87
Two-cylinder transducer has straight line response. Y. T. Li ..... Apr. 151
Ultraprecise tach rejects table noise. D. K. Wilson ..... Oct. 115
Varying two parameters doubles transducer's sensitivity. N. Ravcoveanu ..... Dec. 118
Vibrating string measures acceleration (WN) ..... Apr. 24

Composition measuring (see Analysis instruments)

Computer equipment comparisons

Computer equipment comparison series
4. Printing equipment for medium, intermediate, and large size computers ..... Jan. 91
5. Magnetic tape equipment for medium size computers ..... Feb. 124
6. Magnetic tape equipment for intermediate and large size computers ..... Mar. 105
7. Random access devices for medium to large computers ..... Apr. 131
8. Computer central processors. June 135
9. Central processors for medium, intermediate, and large size computers ..... Oct. 103
10. Other input-output devices for medium and large computers. Nov. 119

Computer input devices

Machine recognizes handwritten numerals (WN) ..... Sept. 30
Norden closes Systems Dept.; will vote counter die too? (WN) ..... Jan. 142
Shoebox recognizes its master's voice (WN) ..... Jan. 25
Speech-to-digital converter in breadboard operation (WN) ..... Aug. 32

Computer programming

Choosing an automatic program for numerical control. Robert Heslen Apr. 109
Computer makers rush software to aid control programmers (WN) ... Mar. 24
New software broadens critical-path programming (WN) ..... Sept. 28

Computers (see also Information systems)

Analog
Analog computer measures BTU content. Stanton & Bremer ..Dec. 97
Analog computer optimizes electric power usage (WN) ..... June 20
Analog computer setup displays frequency response. F. E. S. Manton ..... Jan. 83
Analog computing control for on-line applications. F. C. Shinskey Nov. 71
Automatic plotter extracts data from computer response curves. T. P. Fitzgibbon ..... Apr. 95
Control applications for new dead-space limiter. G. A. Korn..Mar. 91
Feed enthalpy computer control of a distillation column. Oglesby & Lupfer ..... Feb. 87
Simulating sampled data control. Fluegel & Freeman ..... June 123
Simulating true dry friction on the analog computer. Wang & Shen Oct. 91
Simulator speeds training by adapting to human performance (WN) Aug. 24

Digital
Computer-directed checkout for NASA's biggest booster. J. W. Dahnke ..... Aug. 84
Computer equipment comparison series
5. Magnetic tape equipment for medium size computers ..... Feb. 124
6. Magnetic tape equipment for intermediate and large size computers ..... Mar. 105
7. Random access devices for medium to large computers ..Apr. 131
8. Computer central processors. June 135
9. Central processors for medium, intermediate, and large size computers ..... Oct. 103
10. Other input-output devices for medium and large computers Nov. 119
Designing digital computer control systems. Cundall & Latham. Pt. I Short sampling periods. Oct. 82
Direct digital computer control. A. L. Giusti & others ..... June 104
How to make computer compatible data tapes. R. E. Wright .... May 127
Information control computers—messages pay for data links. James Sweeney ..... May 122
Microwave computing element approaches nanosecond rate (WN) May 28
The next generation of computers (WN) ..... Feb. 22
Printing equipment for medium, intermediate, and large size computers ..... Jan. 91
Simple arithmetic computes cutter offsets. Kaiwa & Inaba .... Mar. 93
Solomon computer to take 1,024 steps at a time (WN) ..... Aug. 26
Traffic control computers get green light (WN) ..... Apr. 20

Special purpose
Analog computing control for on-line applications. F. C. Shinskey Nov. 71
Computer finds key to car parking. S. S. Livers ..... Feb. 85
Computer-spectrometer reads out component percentages. W. Schulz ..... June 147
Dividing computer for automatic slope and gain control. Pawlik & Vasu ..... Jan. 66
Guidance and control for manned lunar flight—report ..... June 87
Hybrid logic for special purpose computers. T. G. Hagan .... Oct. 73
In-plant colorant computer matches colors quickly. McMahon & Shevzov ..... Feb. 133
Information control computers—messages pay for data links. James Sweeney ..... May 122
ITT sets sights on communications control (WN) ..... Feb. 40
New directions for air traffic control (WN) ..... Jan. 21
Scanner rectifies Tiros weather photos. J. A. Buckbee & others Mar. 119
Simple arithmetic computes cutter offsets. Kaiwa & Inaba .... Mar. 93
Spectrophotometer digital integrator prints out color values. T. Azuma & others ..... Feb. 131

Computing control

Analog computer optimizes electric power usage (WN) ..... June 20
Analog computing control for on-line applications. F. C. Shinskey .. Nov. 71
Computer makers rush software to aid control programmers (WN) ... Mar. 24
Control makes inroads in cement (WN) ..... Nov. 22
Designing digital computer control systems. Cundall & Latham. Pt. I. Short sampling periods ..... Oct. 82
Direct digital computer control. A. L. Giusti & others ..... June 104
DOC in the steel industry. Derek Barlow ..... Sept. 139
Feed enthalpy computer control of a distillation column. Oglesby & Lupfer ..... Feb. 87
Industry accepts computing control—and sales boom (IP) ..... May 79
Three interlinked computers to run new British steel works. Massey & Hersom ..... June 128
Traffic control computers get green light (WN) ..... Apr. 20
Univac publishes 580 specs (WN). Nov. 30

Controllers

Active shock absorbers bank car on curves. Hanna & Osbon ..... Mar. 121
Discrete compensator controls dead time process. Masahiro Mori ... Jan. 57
Fast response amplifier controls large ac motors. A. H. Myles ..... Oct. 77
Feedforward control minimizes hot water storage. J. A. Clark Jr. .Nov. 127
A guide to controller tuning. Doris M. Wills ..... Aug. 93
Refrigerant-powered controller keeps cargo cool. C. W. Pflieger .... June 149
Single SCR controls dc shunt motor. Baruch Berman ..... Aug. 79
Tuning maps for three-mode controllers. Doris M. Wills ..... Apr. 104

Counting

How to count inventory. Struble & Devanney ..... Sept. 109

D

Data collection (see also Information systems)

Cheap input is key to job shop production control. T. W. Mullan ... Jan. 87
Computer-directed checkout for NASA's biggest booster. J. W. Dahnke ..... Aug. 84
DOC in a piece-parts industry
I Buying, stocking and scheduling by computer. M. J. Feely .. Sept. 146
II Controlling shop orders. N. E. Johnson ..... Sept. 149
Dynamic quantity information: input for in-plant operational control. D. B. Thompson & others ..... Sept. 120
Fm system reads out Bomarc fuel pressure. J. I. Paul ..... Feb. 137
IR scanner reads freight car numbers. W. W. Sanville ..... Apr. 147
Microwaves identify freight cars. Hamann & Boyd ..... Mar. 102
Punched tags let computer write the orders. M. Luftig ..... Dec. 105

Data Files (Reference sheets)

55. Finding phase angle loci of a distributed lag. M. G. Rekoff Jr. . Jan. 71
56. Graphical technique solves 4th and 5th order equations. Deekshatulu & Chidambara ..... Feb. 105
57. Control applications for new dead-space limiter. G. A. Korn .... Mar. 91
58. To plot root locus: use synthetic division. H. F. Klock ..... Apr. 115
59. Finding system characteristics from initial step response. G. M. Hoerner Jr. ..... May 103

60. A way to design low-loss nonlinear networks. T. R. Fredriksen..June 117
61. Encoder speed nomograph. M. C. Wilson .....July 97
62. A guide to controller tuning. Doris M. Wills .....Aug. 93
63. Simulating true dry friction on the analog computer. Wang & Shen Oct. 91
64. Finding system settling time. Gelb & Sandberg .....Nov. 103
65. Finding second order system characteristics from initial step response. G. M. Hoerner Jr.....Dec. 93

Data logging

Deep space—hot and cold—simulated in vacuum chambers (WN)...July 24
How to count inventory. Struble & Devanney .....Sept. 109

Data processing (see also Information systems)

Automatic product design spreads control in all directions. Robert Heslen .....May 106
Computer-directed checkout for NASA's biggest booster. J. W. Dahnke .....Aug. 84
DQC in a service industry. McGuire & Galbraith .....Sept. 143
Go-betweens handle sales of spare computer time (WN) .....Nov. 38
How to make computer compatible data tapes. R. E. Wright....May 127
Industry schedules by computer—CPM and PERT. (WN).....Jan. 16
Monitoring and controlling computer time. E. M. Chafets.....Dec. 101
New look for EDP service centers (IP) .....Mar. 61
Punched tags let computer write the orders. M. Luftig.....Dec. 105
Scanner rectifies Tiros weather photos. J. A. Buckbee & others.....Mar. 119
Scientific satellite data: an embarrassment of riches (WN).....Sept. 26
Three interlinked computers to run new British steel works. Massey & Hersom .....June 128
U. S. government: mirror for ADP market (IP) .....Nov. 63
When can you justify optical character readers? T. W. Helweg...Feb. 119

Data reduction

Advanced computer system to track space probes (WN).....Dec. 20
Automatic plotter extracts data from computer response curves. T. P. Fitzgibbon .....Apr. 95
Scientific satellite data: an embarrassment of riches (WN).....Sept. 26

Data transmission (see also Information systems and Telemetering)

An economic comparison of data transmission systems. McGregor & Skoumal .....July 107
Available facilities for data communications. J. F. Holmes.....June 133
Facts and cautions for planning data communications. Sheldon & Luzon Aug. 105
Guidance and control of manned lunar flight—report .....June 87
How to do your own communications study. J. F. Holmes.....Nov. 114
Information control computers—messages pay for data links. James Sweeney .....May 122
ITT sets sights on communications control (WN) .....Feb. 40
Low power factor watt transducer with VLF data link. Lenehan & Wintermute .....May 141
Microwave links transmit radar data. L. G. Marcus.....July 100
New management system capabilities appear (WN) .....May 21
Roundup: techniques for radio telemetry. E. D. Lucas.....Dec. 71

Deadtime

Control applications for new deadspace limiter. G. A. Korn.....Mar. 91
Discrete compensator controls deadtime process. Masahiro Mori...Jan. 57
Two ways to simulate deadtime digitally
Method I—Input differentiation, storage and integration. R. J. Paul .....Aug. 97
Method II—Direct A-D/D-A conversion. M. Steinberg.....Aug. 98

Design, automatic

Automatic product design spreads control in all directions. Robert Heslen May 106
Designing control systems automatically (WN) .....May 30

Diagramming, circuits

Shorthand reduces control circuit description. J. H. Champagne..Nov. 106

Digital techniques (see also Information systems)

Automatic blending conserves refinery tankage. D. C. Schall.....Dec. 77
A checklist for designing digital systems. T. S. Eason.....July 113
Digital data checker compares computers. Robert Newman.....Oct. 115
Digital servo without jumps or ambiguity. W. R. Lamb.....Jan. 78
IR scanner reads freight car numbers. W. W. Sanville.....Apr. 147
Keys identify tools in automatic changer. John Fulton.....Aug. 118
Magnetic cylinder runs paper guillotine. J. P. Forest.....Apr. 149
Microwave computing element approaches nanosecond rate (WN)..May 28
Microwaves identify freight cars. Hamann & Boyd.....Mar. 102
9 criteria for selecting a digital code. C. H. Wolff.....Apr. 128
Nuclear ship Savannah to get digital rod control system (WN).....Oct. 22
NC positioner works in binary. Manning & Linn.....July 123
Precision generator ranges down to 1 cycle per day. Richard Keyes..Jan. 105
Ratio computer gages hot beams on the fly. William Pepper Jr.....Dec. 113
Two ways to simulate deadtime digitally
Method I—Input differentiation, storage, and integration. R. J. Paul .....Aug. 97
Method II—Direct A-D/D-A conversion. M. Steinberg.....Aug. 98
Vibrating tape allows low-speed playback. Hutchinson & Webb....Dec. 117

Display of data (see also Information systems)

Automatic plotter extracts data from computer response curves. T. P. Fitzgibbon .....Apr. 95
Information Displa. Society holds charter meeting (WN) .....Dec. 29
Predictor instruments look into the future. C. R. Kelley.....Mar. 86
What you should know about control panels. W. T. Dumser.....Mar. 67

Dynamic quantity control

Applying control to inventory management. H. Chestnut & others..Sept. 96
Automatic weighing for solids. F. M. Ryan .....Sept. 103
DQC in chemical plants. W. J. Frink .....Sept. 134
DQC in a piece-parts industry
I Buying, stocking and scheduling by computer. M. J. Feely....Sept. 146
II Controlling shop orders. N. E. Johnson .....Sept. 149
DQC in a service industry. McGuire & Galbraith .....Sept. 143
DQC in the steel industry. Derek Barlow .....Sept. 139
Dynamic quantity information: input for in-plant operational control. D. B. Thompson & others .....Sept. 120
How to count inventory. Struble & Devanney .....Sept. 109
Introducing dynamic quantity control. M. P. Southworth.....Sept. 94
Keeping stock on length. A. P. Wiles Sept. 117
Level gaging. H. R. Karp.....Sept. 116
Measuring fluid flow. J. D. Goodrich .....Sept. 111

E

Economics

Automatic ships—only hope for the U. S. Merchant Marine? C. T. Clayton .....July 73
Capital spending heads for new records (WN) .....June 37
Control prospects on the NEW new frontier (IP) .....Sept. 89
An economic comparison of data transmission systems. McGregor & Skoumal .....July 107

Editorials

Actuators shift into high.....Dec. 69
A hole in the middle.....Nov. 67
Information abounds—let's use it..Aug. 67
Initiative plus payoff.....Jan. 49
Is a manpower bottleneck approaching? July 69
It all sounds so easy.....Apr. 87
It's the bits and pieces that count..June 85
A major stumbling block.....Mar. 65
More sides to the triangle.....May 83
Prophets for the asking.....Oct. 65
Up but not out.....Feb. 83

F

Flow, fluid

Adjusting pump rpm for flow regulation. W. G. Holzbock....Oct. 87
Controlling a chemically fueled auxiliary power unit. F. L. Oppenheimer Mar. 98
Measuring fluid flow. J. D. Goodrich .....Sept. 111
Novel mass flowmeter. J. Haffner & others .....Oct. 69
Refrigerant-powered controller keeps cargo cool. C. W. Pflieger....June 149
Suction measurement speeds oil transfer. Bruce Cross.....Oct. 121

Foreign control

An American in Germany (WN)..Jan. 29
Designing control systems automatically (WN) .....May 30
Garrett's sharing policy aims at Canadian sales (WN).....Aug. 36
GE or not GE?—that's a (British) question (WN) .....July 40
Information processing—are ideas slowing up? (WN).....Oct. 35
Instrument shopping for overseas plants (IP) .....Aug. 63
Letter from Czechoslovakia (WN).Feb. 34
NC market in Britain (WN).....Aug. 35
Process modelling reopens zinc mine (WN) .....Nov. 32
Solid state in Britain (WN).....Apr. 32

Western European resistance to advanced systems crumbles (WN). June 32
West German Postal Ministry adopts automatic mail sorting (WN). Dec. 31

Frequency response

Analog computer setup displays frequency response. F. E. S. Manton Jan. 83
Electromechanical generator-multiplier simplifies response tests. J. G. Balchen ..... June 151
Finding second order system characteristics from initial step response. G. M. Hoerner Jr. ..... Dec. 93
Finding system settling time. Gelb & Sandberg ..... Nov. 103
A guide to controller tuning. Doris M. Wills ..... Aug. 93
Multipurpose process test panel. E. J. Kuhlmann ..... June 114
Tuning maps for three-mode controllers. Doris M. Wills ..... Apr. 104

Function generators

Control applications for new deadspace limiter. G. A. Korn ..... Mar. 91
Electromechanical generator-multiplier simplifies response tests. J .G. Balchen ..... June 151
Function generator runs shaft straightener. H. C. Ovshinsky ..... Jan. 103
Precision generator ranges down to 1 cycle per day. Richard Keyes. Jan. 105

G

Gaging

Acoustic gages for centerless grinding. F. H. Baer ..... May 139
Radioisotope scatter checks tin coatings. F. H. Baer ..... Apr. 145
Ratio computer gages hot beams on the fly. William Pepper Jr. ..... Dec. 113

Graphic analysis

Finding phase angle loci of a distributed lag. M. G. Rekoff Jr. ..... Jan. 71
Finding second order system characteristics from initial step response. G. M. Hoerner Jr. ..... Dec. 93
Finding system settling time. Gelb & Sandberg ..... Nov. 103
Graphical technique solves 4th and 5th order equations. Deekshatulu & Chidambara ..... Feb. 105
A guide to controller tuning. Doris M. Wills ..... Aug. 93
To plot root locus: use synthetic division. H. F. Klock ..... Apr. 115
Tuning maps for three-mode controllers. Doris M. Wills ..... Apr. 104

Graphic panels

What you should know about control panels. W. T. Dumser ..... Mar. 67

Guidance

Automatic gyro trimming during platform alignment. Shu Lee ..... May 85
Automatic ships—only hope for the U. S. Merchant Marine? C. T. Clayton ..... July 73
The case for dead reckoning. E. M. Fischel ..... Oct. 71
Exotic gyros. J. M. Slater. Pt. I. Free rotor gyros ..... Nov. 92
Guidance and control for manned lunar flight—report ..... June 87
Land navigation system tells driver where to go. L. A. Miller ..... Mar. 115
Schuler detuning cuts verticality errors. E. M. Fischel ..... July 95

Gyros

Attitude control of earth satellites. R. K. Whitford. II: Sensing and modes of control ..... Apr. 97
Automatic gyro trimming during platform alignment. Shu Lee ..... May 85
Exotic gyros. J. M. Slater. Free rotor gyros ..... Nov. 92
Schuler detuning cuts verticality errors. E. M. Fischel ..... July 95

H

Hydraulics

Active shock absorbers bank car on curves. Hanna & Osbon ..... Mar. 121
Bootstrapped variable displacement pump servo. S. Z. Dushkes. Apr. 123
Designing load-compensated fast-response hydraulic servos. T. J. Viersma ..... May 111
Electrohydraulic pulse motor. Kaiwa & Inaba ..... Jan. 73
Hydraulic digital actuator works on eight-bit input (WN) ..... Sept. 32

I

Industrial control

Adjusting pump rpm for flow regulation. W. G. Holzbock ..... Oct. 87
Atoms work harder for industry (IP) June 81
Automatic startup for gas turbines. R. B. Gillstrom ..... Apr. 119
Automatic weighing for solids. F. M. Ryan ..... Sept. 103
DQC in the steel industry. Derek Barlow ..... Sept. 139
Function generator runs shaft straightener. H. C. Ovshinsky ..... Jan. 103
Industry accepts computing control—and sales boom (IP) ..... May 79
Industry schedules by computer—CPM and PERT. (WN) ..... Jan. 16
Keeping stock on length. A. P. Wiles. Sept. 117
Maintenance specialists in control: growing pains, promising future (IP) Apr. 81
Multiaperture core logic: new reliability for industrial telemetry. Georgens & Duthie ..... Mar. 75
Programmed component insertion machines assemble computer logic cards. A. H. Johnson ..... Jan. 61
Ratio counter measures fiberboard cuts. E. Willard ..... July 119
Self-testing safety system minimizes downtime of power reactors. Hill & Pinder ..... May 89
Servovalve controls flying shear cut-off. L. C. Roess ..... July 119
Skin effect checks packs of blades. G. Schouten ..... Jan. 98
Weighing scales couple to computer. Kennedy & Hibscher ..... July 83

Industry's Pulse

Atoms work harder for industry. June 81
Control prospects on the NEW new frontier ..... Sept. 89
Electric valve actuators: slow today, digital tomorrow ..... Oct. 61
Hot gas controls waiting in the wings July 65
Industry accepts computing control—and sales boom ..... May 79
Instrument shopping for overseas plants Aug. 63
Jumbled marketplace fails to slow stream analyzers ..... Dec. 62
Maintenance specialists in control: growing pains, promising future. ..... Apr. 81
New entries in control systems engineering ..... Jan. 45
New look for EDP service centers. Mar. 61
U. S. government: mirror for ADP market? ..... Nov. 63
Who's buying numerical control? Feb. 79

Information systems

Available facilities for data communications. J. F. Holmes ..... June 133
Cheap input is key to job shop production control. T. W. Mullan. Jan. 87
A checklist for designing digital systems. T. S. Eason ..... July 113
Computer equipment comparison series
4. Printing equipment for medium, intermediate, and large size computers. Jan. 91
5. Magnetic tape equipment for medium size computers ..... Feb. 124
6. Magnetic tape equipment for intermediate and large size computers ..... Mar. 105
7. Random access devices for medium to large computers ..... Apr. 131
8. Computer central processors. June 135
9. Central processors for medium, intermediate, and large size computers ..... Oct. 103
10. Other input-output devices for medium and large computers. Nov. 119
DQC in a piece-parts industry
I Buying, stocking and scheduling by computer. M. J. Feeley. Sept. 146
II Controlling shop orders. N. E. Johnson ..... Sept. 149
Dynamic quantity information: input for in-plant operational control. D. B. Thompson & others ..... Sept. 120
An economic comparison of data transmission systems. McGregor & Skoumal ..... July 107
Facts and cautions for planning data communications. Sheldon & Luzon Aug. 105
A general approach to information systems design. A. G. Boyd. Aug. 100
How to do your own communications study. J. F. Holmes ..... Nov. 114
How to make computer compatible data tapes. R. E. Wright ..... May 127
In coding it's the structure that counts. W. J. Frink ..... Oct. 100
Information control computers—messages pay for data links. James Sweeney ..... May 122
Microwaves identify freight cars. Hamann & Boyd ..... Mar. 102
Monitoring and controlling computer time. E. M. Chafets ..... Dec. 101
9 criteria for selecting a digital code. C. H. Wolff ..... Apr. 128
Punched tags let computer write the orders. M. Luftig ..... Dec. 105
Systems men at ISM: Economics on their minds (WN) ..... Dec. 29
Three interlinked computers to run new British steel works. Massey & Hersom ..... June 128
When can you justify optical character readers? T. W. Helweg ..... Feb. 119

Inspection, automatic

Memory drum and phasemeter check gear errors dynamically. Derek Barlow ..... Dec. 117
Skin effect checks packs of blades. G. Schouten ..... Jan. 98

Instrumentation

Analog computer measures BTU content. Stanton & Bremer ..... Dec. 97
Automatic blending conserves refinery tankage. D. C. Schall ..... Dec. 77
Automatic surveyor looks for wavy runways. Don Winston ..... June 149
Automatic titrator tests oil samples continuously. D. A. Patient ..... Apr. 143
Computer-directed checkout for NASA's biggest booster. J. W. Dahnke ..... Aug. 84
Controlling composition of column product. Stanton & Bremer. July 104

Deep space—hot and cold—simulated in vacuum chambers (WN)....July 24
How to make computer compatible data tapes. R. E. Wright....May 127
Instrument shopping for overseas plants (IP).....Aug. 63
Meter relays—choosing the right type. J. F. Schmidheini.....July 77
Multipurpose process test panel. E. J. Kuhlmann.....June 114
Photoelectric leak detector looks for bubbles. Huffman & Mitchell Jr. July 125
Planning instrument maintenance. G. M. E. Williams.....Aug. 81
Predictor instruments look into the future. C. R. Kelley.....Mar. 86
Pulse generators and counters check paper mill speeds. J. D. Taylor. Mar. 117
Tape transport transports sample as well. J. J. Ronchetto Jr.....Feb. 139
Taped signal times tensile tester. R. J. Coskren.....July 125
What you should know about control panels. W. T. Dumser.....Mar. 67

Inventory control (see also Information systems)

Applying control to inventory management. H. Chestnut & others..Sept. 96
DQC in a piece-parts industry
I Buying, stocking and scheduling by computer. M. J. Feely..Sept. 146
II Controlling shop orders from issue to stock room. N. E. Johnson Sept. 149
DQC in a service industry. McGuire & Galbraith.....Sept. 143
New management system capabilities appear (WN).....May 21
Punched tags let computer write the orders. M. Luftig.....Dec. 105

L

Level

Level gaging. H. R. Karp.....Sept. 116
Microwaves measure water in oil. A. J. De Hond.....May 139

Light

Light beam aligns giant welding fixture. W. A. Abraham.....Nov. 129
Optical and radio sensors guard Atlas launch sites. Porter Jr. & Dodge Jan. 97

Liquids

Measuring fluid flow. J. D. Goodrich Sept. 111
Microwaves measure water in oil. A. J. De Hond.....May 139

Logic

Hybrid logic for special purpose computers. T. C. Hagan.....Oct. 73
Introduction to the neuron. M. J. Pedelty.....Apr. 91
Multiaperature core logic: new reliability for industrial telemetry. Georgens & Duthie.....Mar. 75
Neuron technology builds reliable circuits from unreliable components. M. J. Pedelty.....May 115
Pneumatic logic. E. L. Holbrook IV Feb. 89, V Dec. 85
Self-testing safety system minimizes downtime of power reactors. Hill & Pinder.....May 89

M

Machine control

Choosing an automatic program for numerical control. Robert Heslen Apr. 109
Designing load-compensated fast-response hydraulic servos. T. J. Viersma.....May 111
Keys identify tools in automatic changer John Fulton.....Aug. 118
Light beam aligns giant welding fixtures. W. A. Abraham.....Nov. 129
Magnetic cylinder runs paper guillotine. J. P. Forest.....Apr. 149
NC positioner works in binary. Manning & Linn.....July 123
Numerical control—here is the patent situation. H. W. Mergler.....Feb. 100
Numerical control produces drawings. Kliever & Little.....May 100
Positioning control uses mechanical components. Kaiwa & Inaba....July 92
Servovalve controls flying shear cutoff. L. G. Roess.....July 119
Shorthand reduces control circuit description. J. H. Champagne....Nov. 106
Simple arithmetic computes cutter offsets. Kaiwa & Inaba.....Mar. 93
Who's buying NC? (IP).....Feb. 79

Maintenance

Maintenance specialists in control: growing pains, promising future (IP) Apr. 81
Planning instrument maintenance. G. M. E. Williams.....Aug. 81

Management by computer (see also Information systems)

Dynamic quantity information: input for in-plant operational control. D. B. Thompson & others.....Sept. 120
DQC in the steel industry. Derek Barlow.....Sept. 139
Industry schedules by computer—CPM and PERT (WN).....Jan. 16
New management system capabilities appear (WN).....May 21

Marketing

Atoms work harder for industry (IP) June 81
Control prospects on the NEW new frontier (IP).....Sept. 89
Electric valve actuators: slow today, digital tomorrow (IP).....Oct. 61
Hot gas controls waiting in the wings (IP).....July 65
Industry accepts computing control—and sales boom (IP).....May 79
Instrument shopping for overseas plants (IP).....Aug. 63
U. S. government: mirror for ADP market? (IP).....Nov. 63
Who's buying numerical control? (IP) Feb. 79

Mathematical analysis (see also Graphic analysis)

Analyzing nonlinear systems with random inputs. M. P. Pastel....Feb. 113
Assigning confidence levels to process optimization. Bhavnani & Chen Aug. 75
Ball and disc read angular velocity directly. A. L. Fisher.....Nov. 125
Calculating servomotor speed-torque curves. P. H. Trickey.....Mar. 81
Converting integers: mathematics points to the equipment. P. M. Kintner Nov. 99
Finding system characteristics from initial step response. G. M. Hoerner Jr. .....May 103
Graphical technique solves 4th and 5th order equations. Deekshatulu & Chidambara. .....Feb. 105
To plot root locus: use synthetic division. H. F. Klock.....Apr. 115

Measuring

Analog computer measures BTU content. Stanton & Bremer.....Dec. 97
Automatic titrator tests oil samples continuously. D. A. Patient....Apr. 143
Conductivity cell stays accurate in pipelines carrying slurries. P. G. Kuipers Oct. 121
Integrating chromatograph measures stream-component volumes. E. Lehrer May 95
Keeping stock on length. A. P. Wiles Sept. 117
Level gaging. H. R. Karp.....Sept. 116
Light beam aligns giant welding fixture. W. A. Abraham.....Nov. 129
Memory drum and phasemeter check gear errors dynamically. Derek Barlow .....Dec. 117
Microwaves measure water in oil. A. J. De Hond.....May 139
Novel mass flowmeter. J. Haffner & others .....Oct. 69
Ratio counter measures fiberboard cuts. E. Willard.....July 119
Servovalve controls flying shear cutoff. L. G. Roess.....July 119
Suction measurement speeds oil transfer Bruce Cross.....Oct. 121
X-rays gage ash content continuously. H. Buhrmann.....July 121

Meetings, news reports

AIEE: big merger, small show, fast computers (WN).....Mar. 22
Information Display Society holds charter meeting (WN).....Dec. 29
ISA '62 (WN).....Dec. 24
JACC—process description, adaptive control dominate (WN).....Aug. 30
Numerical Control Society on way to formation (WN).....Aug. 28
Solid State Conference—'hot' subjects absent (WN).....Apr. 30
Systems men at ISM: Economics on their minds (WN).....Dec. 29
WESCON: electronics under the big top (WN).....Oct. 28

Memories

Introduction to the neuron. M. J. Pedelty.....Apr. 91
Magnets indicate carrier orientation, routing. Jim Morrison.....Jan. 103
Multiaperture core logic: new reliability for industrial telemetry. Georgens & Duthie .....Mar. 75
Neuron technology builds reliable circuits from unreliable components. M. J. Pedelty.....May 115

Metals processing and finishing

DQC in the steel industry. Derek Barlow .....Sept. 139
Radioisotope scatter checks tin coatings. F. H. Baer.....Apr. 145
Ratio computer gages hot beams on the fly. William Pepper Jr. .....Dec. 113
Reversing a 12,000-hp mill in 1 sec. G. A. Kaufman.....June 121
Three interlinked computers to run new British steel works. Massey & Hersom June 128

Missiles

Automatic gyro trimming during platform alignment. Shu Lee.....May 85
Controlling a chemically fueled auxiliary power unit. F. L. Oppenheimer Mar. 98
Hot gas controls waiting in the wings (IP).....July 65

Models

Applying control to inventory management. H. Chestnut & others..Sept. 96
Dynamic quantity information: input for in-plant operational control. D. B. Thompson and others.....Sept. 120

N

Navigation (see Guidance)

Networks

Compensating
A way to design low-loss nonlinear networks. T. R. Fredriksen..June 117

Nonlinear systems

Analyzing nonlinear systems with random inputs. M. P. Pastel.....Feb. 113

Nuclear instrumentation

Atoms work harder for industry (IP) June 81
Nuclear ship Savannah to get digital rod control system (WN).....Oct. 22
Optical and radio sensors guard Atlas launch sites. Porter Jr. & Dodge Jan. 97
Self-testing safety system minimizes downtime of power reactors. Hill & Pinder .....May 89
Tape transport transports sample as well. J. J. Ronchetto Jr.....Feb. 139

O

Optimizing control

Assigning confidence levels to process optimization. Bhavnani & Chen Aug. 75

P

Patents

Numerical control—here is the patent situation. H. W. Mergler....Feb. 100

Personality sketches

Balchen, Jens G.....Dec. 17
Brainard, Wallace E.....Mar. 17
Chien, Gary.....Feb. 19
Clynes, Manfred .....July 21
Gallagher, James D.....Apr. 17
Knoblock, Stanley.....June 17
Lerner, A. Ya.....Jan. 13
Moog, William C.....Oct. 19
Ream, Norman J.....Sept. 23
Slamer, Frank.....Aug. 21
Still, Lt. Col. William L.....May 17
Weiss, Marvin D.....Nov. 19

Pneumatics

Feed enthalpy computer control of a distillation column. Oglesby & Lupfer .....Feb. 87
Hot gas controls waiting in the wings (IP) .....July 65
Pneumatic logic. E. L. Holbrook IV Feb. 89, V .....Dec. 85

Potentiometers

Continuous pot's got no deadspace L. H. Rowley.....Aug. 117

Prediction

Predictor instruments look into the future. C. R. Kelley.....Mar. 86

Pressure

Fm system reads out Bomarc fuel pressure. J. I. Paul .....Feb. 137
Suction measurement speeds oil transfer Bruce Cross.....Oct. 121
Two-cylinder transducer has straight line response. Y. T. Li.....Apr. 151

Process control

Adjusting pump rpm for flow regulation W. G. Holzbock.....Oct. 87
Analog computer measures BTU content. Stanton & Bremer.....Dec. 97
Analog computing control for on-line applications. F. C. Shinskey..Nov. 71
Assigning confidence levels to process optimization. Bhavnani & Chen Aug. 75
Automatic blending conserves refinery tankage. D. C. Schall.....Dec. 77
Computer makers rush software to aid control programmers (WN)..Mar. 24
Conductivity cell stays accurate in pipelines carrying slurries. P. G. Kuipers Oct. 121
Control makes inroads in cement (WN) Nov. 22
Controlling composition of column product. Stanton & Bremer..July 104
Designing digital computer control systems. Cundall & Latham Pt I Short sampling periods.....Oct. 82
Direct digital computer control. A. L. Giusti & others.....June 104
DQC in chemical plants. W. J. Frink Sept. 134
Feed enthalpy computer control of a distillation column. Oglesby & Lupfer .....Feb. 87
Finding second order system characteristics from initial step response. G. M. Hoerner, Jr. .....Dec. 93
A guide to controller tuning. Doris M. Wills .....Aug. 93
In-plant colorant computer matches colors quickly. McMahon & Shevzov Feb. 133
Industry accepts computing control—and sales boom (IP).....May 79
Instrument shopping for overseas plants (IP) .....Aug. 63
Integrating chromatograph measures stream-component volumes. E. Lehrer May 95
Multipurpose process test panel. E. J. Kuhlmann .....June 114
Pulse generators and counters check paper mill speeds. J. D. Taylor Mar. 117
Reversing a 12,000-hp mill in 1 sec. G. A. Kaufman.....June 121
Spectrophotometer digital integrator prints out color values. T. Azuma & others .....Feb. 131
Tuning maps for three-mode controllers Doris M. Wills .....Apr. 104
Tunnel diode controls its own etching. V. A. Vulcan .....May 132
What you should know about control panels. W. T. Dumser .....Mar. 67

Production control (see also Information systems)

Cheap input is key to job shop production control. T. W. Mullan....Jan. 87
Dynamic quantity information: input for in-plant operational control. D. B. Thompson & others.....Sept. 120
DQC in chemical plants. W. J. Frink Sept. 134
DQC in the steel industry. Derek Barlow .....Sept. 139
In coding it's the structure that counts. W. J. Frink .....Oct. 100

Programmed systems

Automatic startup for gas turbines. R. B. Gillstrom .....Apr. 119
Choosing an automatic program for NC. Robert Heslen.....Apr. 109
Computer finds key to car parking. S. S. Livers .....Feb. 85
Magnetic cylinder runs paper guillotine. J. P. Forest .....Apr. 149
Magnets indicate carrier orientation, routing. Jim Morrison .....Jan. 103
Programmed component insertion machines assemble computer logic cards. A. H. Johnson .....Jan. 61
Programmed loading for spectrum fatigue tests. E. Schiff.....Dec. 90
Tape controls full speed printing of color movies (WN).....July 30
Tape transport transports sample as well. J. J. Ronchetto Jr. .....Feb. 139

Proportioning

Automatic blending conserves refinery tankage. D. C. Schall.....Dec. 77

Q

Quantity control (see Dynamic quantity control)

R

Radiation gaging (see Gaging)

Ratioing (see Proportioning)

Relays

Meter relays—choosing the right type. J. F. Schmidheini.....July 77

Reliability

Adaptive control flies the X-15. Lindahl & McGuire.....Oct. 93
Neuron technology builds reliable circuits from unreliable components. M. J. Pedelty.....May 115
Self-testing safety system minimizes downtime of power reactors. Hill & Pinder .....May 89

S

Sampled-data systems

Discrete compensator controls dead time process. Masahiro Mori..Jan. 57
Potentiometric amplifiers improve impedance buffering. James DiRocco July 87
Simulating sampled data control. Fluegel & Freeman.....June 123

Scanning

Circular scans read handwriting. Butterfield & Dowsing.....Aug. 113

Self organizing systems

Learning machine works on information 'globs' (WN) .....May 24
The next generation of computers (WN) .....Feb. 22

Sensors (see Transducers)

Servomechanisms

Bootstrapped variable displacement pump servo. S. Z. Dushkes....Apr. 123
Designing load-compensated fast-response hydraulic servos. T. J. Viersma .....May 111
Digital servo without jumps or ambiguity. W. R. Lamb.....Jan. 78
Friction buster puts limit cycle to use. C. W. Robinson.....Nov. 127
Minimizing servo load resonance error with frequency selective feedback. S. M. Shinners.....Jan. 51
Numerical control produces drawings. Kliever & Little.....May 100

Servovalves (see Valves)

Signal-noise improvement

Improving reliability of shaft position encoders. M. C. Wilson.....June 109
Reducing electrical interference. E. S. Ida .....Feb. 107

Simulation

Applying control to inventory management. H. Chestnut & others..Sept. 96
Deep space—hot and cold—simulated in vacuum chambers (WN).....July 24
Predictor instruments look into the future. C. R. Kelley.....Mar. 86

Simulating sampled data control. Fluegel & Freeman....June 123
Simulating true dry friction on the analog computer. Wang & Shen Oct. 91
Simulator speeds training by adapting to human performance (WN)..Aug. 24
Two ways to simulate deadtime digitally
Method I—Input differentiation storage and integration. R. J. Paul....Aug. 97
Method II— Direct A-D D-A conversion. M. Steinberg....Aug. 98

Slurries

Conductivity cell stays accurate in pipelines carrying slurries. P. F. Kuipers....Oct. 121

Solid-state devices

Multiaperature core logic: new reliability for industrial telemetry. Georgens & Duthie....Mar. 75

Solids

Automatic weighing for solids. F. M. Ryan....Sept. 103

Space vehicle control

Attitude control of earth satellites. R. K. Whitford
I. Sources of torque....Feb. 93
II. Sensing and modes of control Apr. 97
Guidance and control for manned lunar flight—report....June 87
Hot gas controls waiting in the wings (IP)....July 65
Miniature incremental rockets vie for spacecraft control (WN)....Nov. 26
Roundup: techniques for radio telemetry. E. D. Lucas....Dec. 71

Speed-control

Adjusting pump rpm for flow regulation. W. G. Holzbock....Oct. 87
Controlled rectifier fires ignitron fast. D. C. Graham....Oct. 116
Electronic servo fixes capstan speed. Fred Rasmussen....May 137
Fast response amplifier controls large ac motors. A. H. Myles....Oct. 77
Pulse generators and counters check paper mill speeds. J. D. Taylor. Mar. 117
Reversing a 12,000-hp mill in 1 sec. G. A. Kaufman....June 121
Single SCR controls dc shunt motor. Baruch Berman....Aug. 79
Ultraprecise tach rejects table noise. D. K. Wilson....Oct. 115

Stabilization

Minimizing servo load resonance error with frequency selective feedback. S. M. Shinners....Jan. 51

Statistical techniques

Analyzing nonlinear systems with random inputs. M. P. Pastel....Feb. 113
Assigning confidence levels to process optimization. Bhavnani & Chen Aug. 75

Supervisory control

Automatic startup for gas turbines. R. B. Gillstrom....Apr. 119
Oil field production controlled by computer (WN)....July 37

Systems

Analysis
Analyzing nonlinear systems with random inputs. M. P. Pastel Feb. 113
Designing control systems automatically (WN)....May 30
Finding second order system characteristics from initial step response G. M. Hoerner Jr....Dec. 93
Finding system characteristics from initial step response. G. M. Hoerner Jr....May 103
Finding system settling time. Gelb & Sandberg....Nov. 103
A guide to controller tuning. Doris M. Wills....Aug. 93
Minimizing servo load resonance error with frequency selective feedback. S. M. Shinners....Jan. 51
To plot root locus: use synthetic division. H. F. Klock....Apr. 115
Tuning maps for three-mode controllers. Doris M. Wills....Apr. 104
Design
A checklist for designing digital systems. T. S. Eason....July 113
Designing digital computer control systems. Cundall & Latham Pt I Short sampling periods....Oct. 82
Designing load-compensated fast-response hydraulic servos. T. J. Viersma....May 111
Facts and cautions for planning data communications. Sheldon & Luzon....Aug. 105
A general approach to information systems design. A. G. Boyd..Aug. 100
How to do your own communications study. J. F. Holmes...Nov. 114
Specifications
Guidance and control for manned lunar flight—report....June 87

T

Tachometers

Ball and disc read angular velocity directly. A. L. Fisher....Nov. 125
Ultraprecise tach rejects table noise. D. K. Wilson....Oct. 115

Tape recording and reading (see also Information systems)

Magnetic
Computer equipment comparison series
5. Magnetic tape equipment for medium size computers....Feb. 124
6. Magnetic tape equipment for intermediate and large size computers....Mar. 105
How to make computer compatible data tapes. R. E. Wright....May 127
Vibrating tape allows low-speed playback. Hutchinson & Webb Dec. 117
Punched
Tapes for high-speed reading. Love & van den Berg....Nov. 109

Telemetering (see also Information systems)

Low power factor watt transducer with VLF data link. Lenehan & Wintermute....May 141
Microwave links transmit radar data. L. G. Marcus....July 100
Multiaperature core logic: new reliability for industrial telemetry. Georgens & Duthie....Mar. 75
Roundup: techniques for radio telemetry. E. D. Lucas....Dec. 71
Telemetry transducers for electrical variables. Galman & Miller..Aug. 89

Temperature

Extruder cooling cycle sets heater power. F. Perrotta....Aug. 117
Feedforward control minimizes hot water storage. J. A. Clark Jr...Nov. 127
Refrigerant-powered controller keeps cargo cool. C. W. Pflieger....June 149

Testing

Deep space—hot and cold—simulated in vacuum chambers (WN)....July 24
Digital data checker compares computers. Robert Newman....Oct. 115
Memory drum and phasemeter check gear errors dynamically. Derek Barlow....Dec. 117
Oscillator test set checks linearity and deviation. G. J. Himler & others Oct. 113
Photoelectric leak detector looks for bubbles. Huffman & Mitchell Jr. July 125
Programmed loading for spectrum fatigue tests. E. Schiff....Dec. 90
Pulse testing SCR's saves time and watts. D. H. Breslow....June 145
Taped signal times tensile tester. R. J. Coskren....July 125

Transducers

Acoustic gages for centerless grinding. F. H. Baer....May 139
Attitude control of earth satellites. R. K. Whitford. II: Sensing and modes of control....Apr. 97
Conductivity cell stays accurate in pipelines carrying slurries. P. G. Kuipers....Oct. 121
Improving reliability of shaft position encoders. M. C. Wilson....June 109
Keeping stock on length. A. P. Wiles Sept, 117
Low power factor watt transducer with VLF data link. Lenehan & Wintermute....May 141
Measuring angular acceleration with linear accelerometers. V. B. Corey Mar. 79
Measuring fluid flow. J. D. Goodrich Sept. 111
Novel mass flowmeter. J. Haffner & others....Oct. 69
Optical and radio sensors guard Atlas launch sites. Porter Jr. & Dodge Jan. 97
Telemetry transducers for electrical variables. Galman & Miller..Aug. 89
Two-cylinder transducer has straight line response. Y. T. Li....Apr. 151
Ultraprecise tach rejects table noise. D. K. Wilson....Oct. 115
Varying two parameters doubles transducer's sensitivity. N. Ravcoveanu Dec. 118
Vibrating string measures acceleration (WN)....Apr. 24

Transportation

Active shock absorbers bank car on curves. Hanna & Osbon....Mar. 121
Automatic ships—only hope for the U. S. Merchant Marine? C. T. Clayton....July 73
IR scanner reads freight car numbers. W. W. Sanville....Apr. 147
Land navigation system tells driver where to go. L. A. Miller....Mar. 115
Nuclear ship Savannah to get digital rod control system (WN)....Oct. 22
Traffic control computers get green light (WN)....Apr. 20

V

Valves

Controlling a chemically fueled auxiliary power unit. F. L. Oppenheimer....Mar. 98
Servovalve controls flying shear cutoff. L. G. Roess....July 119

Viscometry

Suction measurement speeds oil transfer. Bruce Cross....Oct. 121

W

Weighing

Automatic weighing for solids. F. M. Ryan ..... Sept. 103

Weighing scales couple to computer. Kennedy & Hibscher ..... July 83

Wiring design

Reducing electrical interference. E. S. Ida ..... Feb. 107

X

X-ray analysis

X-rays gage ash content continuously. H. Buhrmann ..... July 121
